Carlisle Chest

The Carlisle Chest is defined by its bold use of figured wood and classic shaping. Crafted in richly patterned veneers, the surface reveals dramatic grain movement and tonal variation that gives the piece a distinct, one of a kind character. The gently bowed front softens the silhouette, while vertical banding introduces structure and balance across the drawer fronts. Antique inspired hardware adds a traditional note, complementing the warmth and depth of the finish. With its strong presence and thoughtful detailing, the Carlisle Chest offers a refined interpretation of timeless case design.
