Abu Gold Planter

Inspired by a previous whimsical design that has been extremely popular, the Abu Gold Planter with its seated ape, moulded in cast aluminium, lifts a plant-worthy vessel with little effort. The antique gold finish that covers the piece makes the gold planter read as if it has aged. The texture that is inherent in metal poured into moulds in a foundry is evident on this piece, which brings it a vintage flair. It is best to use a liner with the solid metal planter when a planter has a drain hole.
