Square Faux Bois Planter

The flowing twig-like details along the ribbed surface of the Square Faux Bois Planter were hand-applied by artisans who “sculpt” the concrete over a metal frame to look like a rustic faux bois artifact. The Portland finish that settles into the natural crevices enhances the illusion of age that will bring a nice hint of texture to indoor or outdoor settings. Ornamented with tree branches, once the concrete planter is sprouting with plants, it will fool the eye into thinking it is a true antique.
