Cromwell

Demi Black Side Table

The Demi Black Side Table is made of solid Bheslana marble. A bevel that softens the oval that is carved into the stone on both sides to infuse the black accent table with sophistication, as the cut-outs form an oculus. The way the base tapers to a smaller form toward the top is a shapely design move, as is the chamfered detail under the top. This is a very petite table that had a dynamic personality.
