Cromwell

Corfu Ivory Accent Table

Though the Corfu Ivory Accent Table looks as if it is covered with lovely shells, the intricate shapes are actually handmade of ceramic. The table, which is also ceramic, has a round pedestal body that is shaped before it is covered with each of the shells, one at a time, by hand. This is a painstaking process. To complete the illusion that it is covered with sea-life, the surface has barnacle shapes on its top and bottom.
