Cromwell

Helios Drinks Table

With a hint of industrial style, the Helios Drinks Table is made of iron in an antique black finish that brings the base, stem, and rim on the tabletop added patina. The design details are geometric—the fluted bulge on the stem and trumpet shape where it meets the base. The spikes on the top surround are reminiscent of medieval Armory. We've topped the metal drinks table with a disc of white marble for a nice contrast, the black/white interplay a staple in modern farmhouse style.
