Sisalana White Accent Table

The Sisalana White Accent Table was inspired by the flourishing Agave sisalana plant, whose spiky, leathery fronds curl up from the ground just as the petite clumps of leaves on this white accent table do. “My love of the Agave plant, of which hundreds of varieties flourish in the Yucatan, has inspired me for many years,” says the table’s designer Marjorie Skouras. Her passion for the Yucatan Peninsula, the surroundings in which she lives and through which she translates the flora and fauna into dynamic products in her studio, shines in this wrought iron table covered in a mix of crisp gesso white and rough gesso white finishes with a mirrored top.
