Cromwell

Dezi C Table

The Dezi C Table has a top set with natural travertine tiles arranged in a stacked dark-and-light pattern with lines of brass inlay running throughout. The effect of the intermingling of materials is a pop of brightness as the natural light shines on the metal and a hint of warmth as the stone absorbs it. The top on the gold cantilevered table is supported by a clean-lined frame made of iron that rises from a slightly smaller base.
