Honeycomb Gold Side Chair

With a shape inspired by surrealism, the Honeycomb Gold Side Chair, created by Marjorie Skouras, has an organically interesting profile that features an asymmetrical honeycomb pattern on its seat and back. Made of aluminum in a gold finish, the chair will read like a work of art wherever it is placed. Continuing her passion for taking ideas from her surroundings, the initial concept for this piece is the honey harvested from the hives of the stingless Melipona bees that are native to the Yucatan.
