Cromwell

Gieves Drinks Table

The Gieves Drinks Table has a round black granite disc for a tabletop that is supported by a telescoping pedestal crafted from metal that sits atop a fluted base. The top-most portion of the pedestal in an antique brass finish matches the base, while the black granite top matches the larger bottom portion of the flaring column in a bronze finish. The small table, that stands 21 inches high and is 10 inches in diameter, packs a stylistic punch for such a petite piece.
