Wicklow Brass Wall Sconce

Playfully arranged leaves flow upward to culminate at the tip of the Wicklow Brass Wall Sconce. Manipulating wrought iron into such life-like shapes is a difficult process that takes great skill and artistry, the process including pressing, shaping, and hammering flat sheets of metal against a form. Covered in a brass finish, the gold wall sconce is certified for damp locations, which makes it perfect for powder and bath rooms. This sconce, designed by Clarence Mallari, can be mounted sideways.
