Brietta Brass Bath Wall Sconce

The Brietta Brass Bath Wall Sconce, which is made of metal in an antique brass finish, is a study in textural movement and smooth stillness. The way the two milky glass tubes are designed to sit within the undulant wires is a sophisticated design detail, as they leave an open negative space in the middle. The gold sconce, which is fitted with two bulbs that are elongated to fully light the tubes, is 23 inches tall, damp rated, and dimmable
