Classico Table Lamp

The Classico Table Lamp is made of two pieces of clear optic crystal that are banded together by a metal ring in a natural brass finish near the base. Its profile is modeled after a nineteenth-century baluster-shaped vase that was made in the Zanfirico tradition of glassblowing. At 33.5 inches high, this is a tall lamp that culminates with an optic crystal finial. The crystal body allows light to flow through it to make it a vibrant accent piece.
