Hutson Table Lamp

The Hutson Table Lamp is a Milano-inspired design made of composite finished with a pearlescent powders to bring added sheen to the surface of the three round shapes that graduate in color from lighter to darker as the geometric forms rise toward the shade. Sitting atop a disc-shaped base and topped with a very tall shade, the lamp is a great choice for console tables or buffets, as it is 37 inches tall but is only a foot in diameter
