Dawning Table Lamp

The Dawning Table Lamp has a remarkably varied surface created when crystallization takes place in the kiln, the multiple layers of glaze, each of a different color, reacting to the high temperatures to form tiny crystals on the surface of the ceramic lamp. No two will be alike because the crystal pattern that flows up from the bottom will be quite varied. The orb that forms its body projects great beauty with its sunrise over the ocean feel.

Dawning Table Lamp
A2 6000-1039

Dimensions
382 X 382 X 585MM HIGH

Status
NOT IN STOCK
