Cromwell

Steelhouse Rectangular Chandelier

Tom Caldwell created a modern/brutalist light fixture with the Steelhouse Rectangular Chandelier that is made of forged iron rods. “Each rod is hand-forged and fitted together to form this unique linear design,” he explains. “The fact that the black chandelier hangs by chain links is also unique to this fixture and can be manipulated to gain just the correct hanging height. Blacksmithing meets modern design is the essence of this piece.”
