## Chaconne Brass Chandelier

As complex as a profile gets, the Chaconne Brass Chandelier has a circumference ringed in folded metal straps. Each piece is bent seven times to achieve the shape that is then wrapped around the frame. This is a labour-intensive process that takes a tremendous amount of concentration to ensure that the interconnecting straps end up the exact same length. Brightening the overall composition is the brass finish.

### Chaconne Brass Chandelier

A2 9000-1079

### Dimensions

685 X 685 X 559MM HIGH

### Status

NOT IN STOCK
