Dandelion Silver and Gold Chandelier

The Dandelion Silver & Gold Chandelier is a masterful composition that celebrates its namesake flower. The puff-balls that surround the bulbs are made of nails that are bent and welded together, a process that is extremely Labor intensive. Made of wrought iron, the chandelier's undulant rings, orb accents, and leaves are in a contemporary gold leaf finish, while the floral elements are in a mix of contemporary silver leaf and contemporary silver finishes. This special piece expressively celebrates nature.
