Dandelion Silver and Gold Pendant

The Dandelion Silver & Gold Pendant is a masterful composition that celebrates its namesake flower. The puff-balls that surround the bulbs are made of nails that are bent and welded together, a process that is extremely Labor intensive. Made of wrought iron, the pendant's bottom cone, stems, and leaves are in a contemporary gold leaf finish, while the floral elements are in a mix of contemporary silver leaf and contemporary silver finishes. This special piece expressively celebrates nature
