Cromwell

Mauresque Medium Bronze and Gold Chandelier

The Mauresque Medium Bronze & Gold Chandelier is made of sculpted bands of wrought iron in a lovely contemporized floral pattern that drips downward. The shade of the gold and black chandelier has contrasting surfaces in bronze gold and contemporary gold leaf finishes, which means the outside reads as black while the inside is bright gold. The organic shape of this fixture is created by metal panels that are laser cut from sheet metal, which takes great concentration to achieve.
