# Cromwell

## Goldfinch Medium Chandelier

The Goldfinch Medium Chandelier is a complex geometrical puzzle that is worked one arm at a time. Each of the pieces of wrought iron is forged individually and welded to the frame to create the articulating profile. The statuesque fixture has a washed Lucerne gold finish, which has a slight texture to it because it is splattered on after the chandelier is constructed. The shades shown here are sold separately

Goldfinch Medium Chandelier
A2 9000-1213
