Shinju Pearl Bowl Chandelier

The Shinju Pearl Bowl Chandelier, designed by Aviva Stanoff, draws inspiration from the natural beauty of freshwater pearls resting on flowing branches. Crafted from hand-forged wrought iron in a contemporary silver leaf finish, the chandelier's organic frame captures the essence of an underwater seascape. Scattered along the branching form, pearl-like accents reflect the light of six bulbs, creating a soft, luminous effect. This sculptural piece blends artistry and nature in a refined, statement-making silhouette.
