Denison Medium Black Outdoor Lantern

The Denison Medium Black Outdoor Lantern has a wrought-iron frame in a black powder-coated finish. This classic lantern shape has one light surrounded by a glass globe to create a soft glow. The black finish adds subtle texture to the surface of the metal and the connecting rods that suspend it are architectural accents. The Denison is wet location-tested so it is ideal for lighting patios and porches, and this lantern is a terrific choice for hanging above large outdoor loggias
