Cromwell

Katara Live Edge Media Console

This media console features a polished stainless base, inset Walnut shelves in eight separate compartments and a solid Trembesi live-edge top. The Trembesi tree, indigenous to islands in the South Pacific, has the look and characteristics of Black Walnut. Its natural live-edge offers a striking juxtaposition to the contemporary stainless base, giving the piece a unique designer look. The size and shape of natural tops will vary. The piece has grommets for electrical cords.
