Harbor Isle Rectangular Dining Table

The hand-applied dry-brushing effect on the aluminium surface is just one of the notable details on the dining table. The cast top has a basket weave centre, a braided perimeter, and what appears as sliced bamboo within a mitred rectangular frame. At the centre is a removable monogrammed insert for an umbrella pass-through. The stately double pedestal base is attractive is the ideal support, but is also designed to accommodate the umbrella stand. However the removable monogram is attractive as the centre of the top surface when choosing not to use an umbrella.
