Darlana Small Lantern in Polished Nickel

The Darlana series by Chapman & Myers brings classical proportions into balance. An open steel framework with slightly offset corners and distinctive triangular top loop detail blends traditional and minimalist and adds refinement to the classic lantern form. Geometric shapes add modern structure without overwhelming more casual interiors. From single light lanterns, to oversized, tiered chandeliers, the Darlana series creates a focal point outdoors, in entryways, above kitchen islands, and in dining or living rooms.
